

DAY SEMINAR

Mechanical profile cylinders and the production of master key systems and keys

Register now!

Date: Friday, November 18th, 2022
Time: 9 a.m. to approx. 7 p.m.
Venue: BASI GmbH (Seminar room)
Langmaar 7, 41238 Mönchengladbach
Seminar fee: 199,00 € per attendee plus VAT
(boarding included)

T H E O R Y

- setup of a profile cylinder
- characteristics of a profile cylinder (picking protection, drill resistance, bump protection etc.)
- workings of a profile cylinder
- basic rules for the creation of different keyings and master key systems
- generating single codings and master key systems

P R A C T I C E

- dismantling a profile cylinder
- repinning of a profile cylinder with help of a sample key
- pinning of a profile cylinder along existing code or master key plan
- modification of a standard cylinder into knob cylinder or changing into emergency function
- function testing

Additionally you will be learning: Key cutting with support of a „mother-key-set“ and code-appliances used on a mechanical key cutting machine. Single production of key copies and the decryption and correction of obsolete keys on electronic key cutting machines.
