4 026434149418

### How to Close

1. Hold the lock in your right hand and carefully place the first hook in one of the gaps on the inside of the steering wheel.
2. Pull the lock apart with your left hand so that the hook on the other side surrounds the steering wheel. For increased safety, place the hook in the small gaps of the steering wheel.

### How to Open

1. Open the lock by turning the key clockwise in the lock.
2. Press the hooks back together and remove the lock from the steering wheel

**Attention:** To avoid injury, do not attempt to start or drive the car while the steering lock is still installed. Do not stow the steering wheel lock where it might disturb you while driving, such as in the driver's footwell, on the gear lever or handbrake.
